

Vitis Installation Guide

Make sure your system has around 100GB of free space.

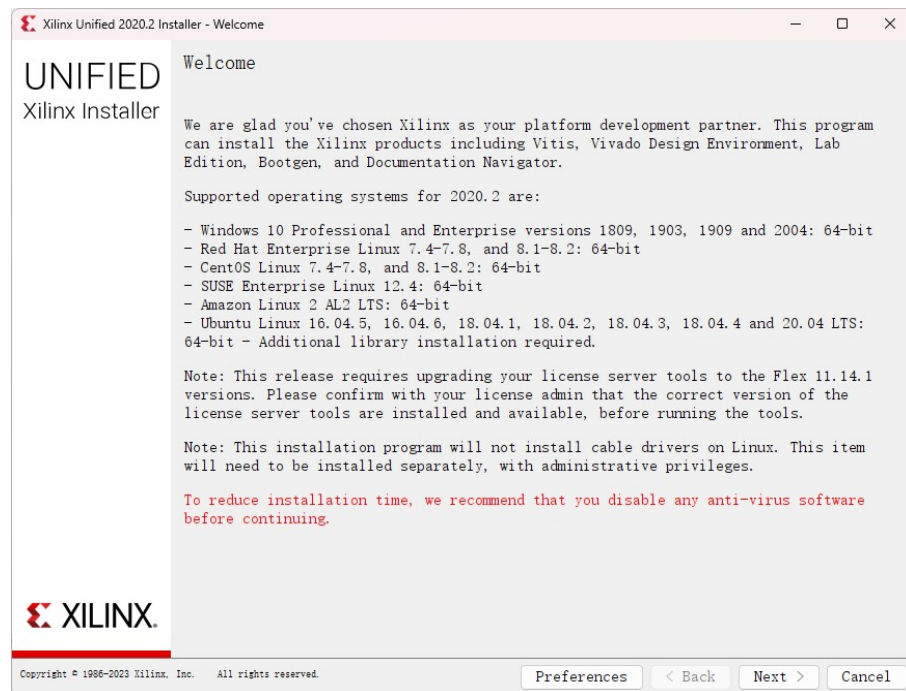

Steps

1. Download package:

- Stable version: https://www.xilinx.com/member/forms/download/xef.html?filename=Xilinx_Unified_2020.2_1118_1232.tar.gz
- Other versions : <https://www.xilinx.com/support/download.html>

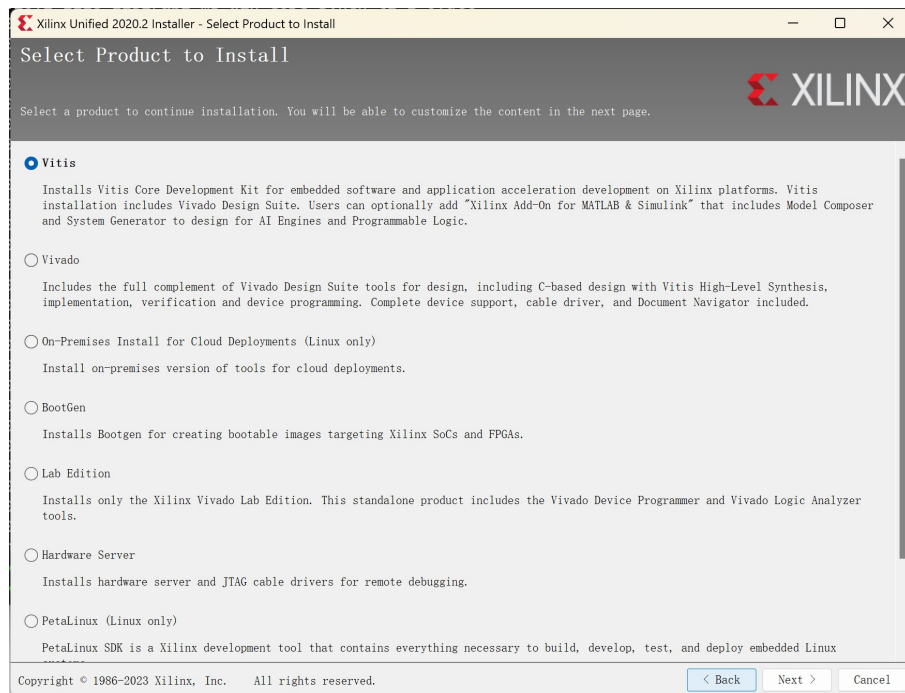

2. Extract the tarball and launch the installer.

- For Windows: double-click on `xsetup.exe`
- For Linux: run `sudo ./xsetup` in terminal.

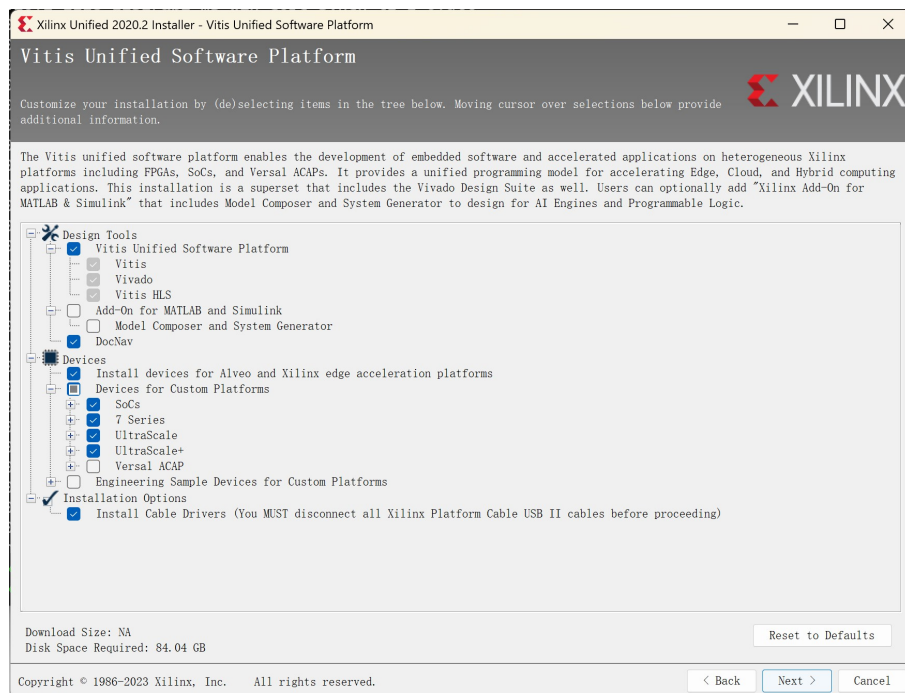

Click **Next**.

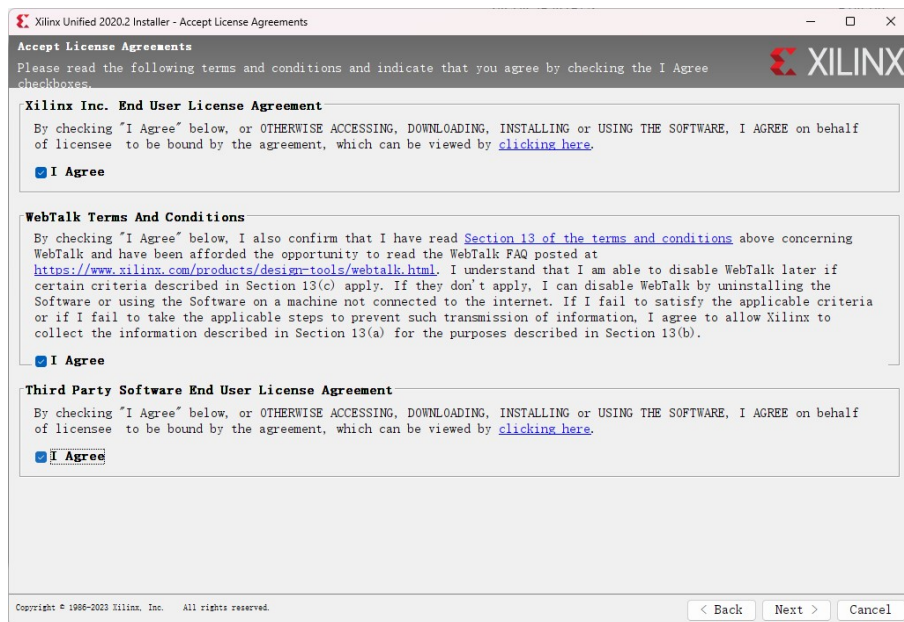

3. Select **Vitis**, click **Next**.

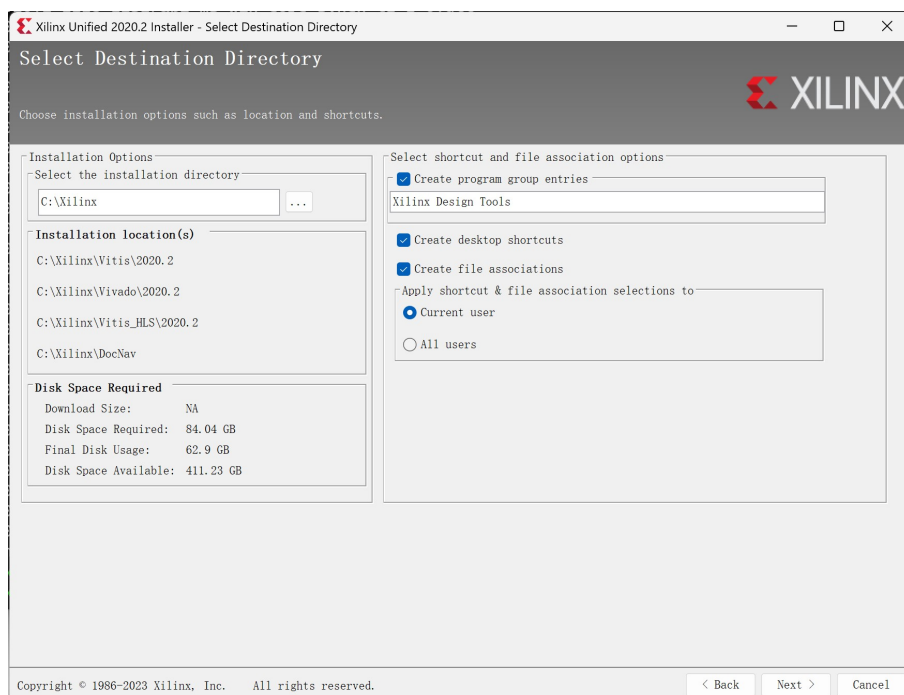

4. Check the boxes as below, click **Next**.

5. Check all the **I Agree** boxes. Click **Next**

6. Change the **installation directory** if needed. Click **Next**

7. Review the configurations and click **Install**.

8. Wait for the installer to finish.

Ask AI or contact TA if you have any problems.
